PROFESSIONAL SUMMARY

IT professional and data analyst with 15+ years across IT support, business analysis, procurement and data analytics in Sudan, Saudi Arabia and the UAE. Native Arabic speaker who trains, evaluates and annotates Arabic AI data with strong command of Modern Standard Arabic and Sudanese, Egyptian, Gulf, Levantine, Iraqi and Yemeni dialects. Google-certified in Data Analytics, Business Intelligence and AI Essentials, with a track record of careful, rule-based work and clear written reasoning.

CORE SKILLS

AI Training & Annotation	LLM response evaluation and ranking, dialect identification, sentiment and intent labeling, translation quality review (MQM), ideal response writing, annotation guidelines
Data Analytics	Power BI, Tableau, Excel, R, data cleaning, dashboard creation
Programming & Databases	Python, SQL
Business & Process	Requirements gathering, Agile/Scrum, KPI tracking, process optimization, vendor negotiation
Languages	Arabic (native), English (professional), German (basic)

PROFESSIONAL EXPERIENCE

Career Break
2022 – 2026

Relocated from Sudan for personal safety reasons; resettled in Canada as a Permanent Resident (2026).

- Kept my skills active through remote freelance English–Arabic translation and data analysis projects
- Completed Google certifications in Data Analytics, Business Intelligence, Python and AI Essentials (2024)

Independent Data Analytics & Translation Consultant
05/2017 – 12/2021

Freelance | Remote / Global

- Provided independent consulting services specializing in data analysis
- Delivered professional English–Arabic translation
- Translated business data into clear visual dashboards and reports, enabling clients to make data-informed operational decisions

Purchasing Representative
08/2014 – 04/2017

Al-Taiara Transport by Heavy Trucks | Dubai, UAE

- Sourced and procured replacement parts and heavy-duty equipment; maintained strategic relationships with parts suppliers and dealers
- Monitored procurement spending and analyzed market trends for parts and fuel to identify cost savings without compromising fleet safety
- Managed spare-parts inventory with min/max reorder points and regular cycle counts to prevent stockouts and reduce holding costs
- Tracked purchase orders to delivery, optimized shipping for urgent parts and coordinated with the maintenance team
- Inspected incoming shipments and managed returns, exchanges and warranty claims; kept complete records of purchases, contracts and invoices

IT Business Analyst 11/2011 – 08/2014

Design Services Est. (Engineering & Design) | Jeddah, Saudi Arabia

- Gathered and documented business requirements with cross-functional stakeholders, translating needs into technical specifications and user stories
- Analyzed IT systems and workflows to identify inefficiencies and recommended structured solutions
- Proposed software, hardware and process changes aligned with business goals and budget
- Supported system implementations including data migration, integration and post-launch troubleshooting
- Performed data analysis with SQL and Business Intelligence tools to monitor performance and deliver insights

IT Support Specialist 09/2005 – 12/2010

Spectrum Plastic Factory (Manufacturing) | Khartoum, Sudan

- Provided first and second-level technical support for 200+ end users in a secure LAN environment
- Configured and troubleshot TCP/IP, DSL and dial-up connections using enterprise routers and switches
- Managed user accounts, file permissions and shared printers on Windows 2000 Server
- Resolved hardware failures and deployed antivirus updates and monthly security patches

EDUCATION

Bachelor of Business Administration | Al-Neelain University, Sudan | July 2005

CERTIFICATIONS

- Google Business Intelligence Certificate (2024)
- Google Data Analytics Certificate (2024)
- Google Crash Course on Python (2024)
- Google AI Essentials Certificate (2024)
